

Alere™ Toxicology

Toxicologists/Reporting Scientists

Based at either Cardiff or Abingdon

Alere Toxicology is a world leading provider of diagnostic products and services.

We are now seeking scientists who are experienced in data interpretation, predominantly hair testing results, to be part of our team. To succeed in this role, you will have a sound technical working knowledge of sample preparation, LC-MS and GC-MS, and will have a proven hands-on approach to dealing with a variety of analytical challenges. You will have experience of producing formal reports, suitable for use in legal cases and employment tribunals. Experience of providing verbal expert testimony is desirable.

Using your extensive scientific experience, in-depth knowledge of current analytical techniques and instrumentation and detailed knowledge of drug metabolism and drug detection windows, you will be a point of contact for technical customer enquiries.

You will possess excellent team working skills, and an ability to motivate others. You will also have an aptitude for problem solving. An interest in the application of new analytical techniques and process improvement will put you in a very advantageous position.

All candidates must be able to prove eligibility to work in the UK.

If the above sounds like something you can do, please send your application (CV and Cover Letter) to Liz.Recchia@alere.com
